

✚ ProArc at the 17th International Essen Welding Fair - Essen, Germany

Once again, ProArc has just been back from the **17th International Essen Welding Show** held in Essen, Germany. In spite of the global economic difficulties, as anticipated, we have experienced the same high level of participants and more than 500 visitors from

60 countries worldwide stopped by our booth. At 180m² stand space, ProArc had presented a complete overview of the latest cutting and welding technology such as laser cutting system, plasma bevel device, auto drilling machine and welding package automation making one of the spotlight at the fair. Over 26 countries of ProArc distributors joined the meeting and share their experiences with us this time. This fair owes its famous name as “Olympics of Welding Technology” and its four-year event rhythm is the meeting place where experts meet the experts. ProArc unite its marathon spirit and will continue to emit light and heat anywhere else in the world.

✚ Global distributors alliance in Essen

We would like to thank all our visitors and the partners who shared the greatest moments with us at the Essen Welding Show from Sept 14 ~ 19, 2009. From our short meeting, we got a lot of precious information and chance to introduce more of ProArc's newest innovations.

It's a great opportunity to extend our appreciation to our global partners for joining us the dinner party. We trust, all our partners gained more impression on the products staged live at the Essen fair, whereas, to those who could not join us this time, we would be glad to see you at the next exhibition.

🚧 Comprehensive product overview at the Essen 2009

1. Circumferential Welder

- * Application: cylinder welding / end-cap welding
- * Full digital & PLC control
- * Allows 7 angular position adjustment (0~90 degree)

2. Shear Welder

- * Application: tube & pipe mills / roll formers/ press lines
- * Extraordinary guide 3 blade pneumatic shear design
- * Suitable for multi-production lines

3. Manipulator

- * Designed for circumferential or longitudinal welds
- * Different size and capacity are available
- * All ProArc manipulators have anti-fall device

4. CNC plate drilling

- * Application: Connection plate hole drilling/ tapping/ long hole milling
- * Cantilever type / Gantry type available with hydraulic and servo control
- * Special design 4-Drills spindle increase the drilling efficiency

5. Plasma / Oxy-fuel CNC cutting machine

- * High Speed & Precision CNC cutting machine
- * PC-Based CNC controller and compact gas console
- * Can be incorporated with variety of plasma cutting system

6. ReaLaser

- * Equipped with Rofin new generation diffusion slab CO₂ Laser
- * Available from 600 to 6000 watts
- * All-in-one design

7. Turning Roll

- * Capacities range from 1,000 to 60,000 kilograms
- * For pipes or vessels rotation
- * Quick, accurate roll centering adjustment

8. E.Z.Arc welding system

- * CE conformity
- * Combination of positioners and turning rolls
- * Flexible choice for your automatic welding system

9. Longitudinal Seamer

- * Straight line welding
- * Suitable for thickness 0.1 mm to 10 mm
- * PLC control with HMI

10. Slide & weld oscillator

- * Manual & electrical type available
- * Various stroke
- * Weld oscillator for 150 mm stroke

ProArc have featured these items at the 2009 Essen Welding show. Should you be interested in any of these items, send us your inquiry at sales@proarc.com.tw or fax: +886 3 469 4499.
