

■ ProArc, Professional Welding and Cutting Systems Announces 40th Anniversary

ProArc marks its 40th anniversary in the welding and cutting field. We are taking this opportunity to thank everyone for the continued patronage for these long years. With your extensive support, we have exported our welding and cutting products to 41 countries worldwide. We recognize the contribution you make in helping us maintain the position we enjoy in the industry.

We know that the growth and success of our company is largely dependent on having strong and capable staff members. On this 40th anniversary, we are celebrating our past with a look to the future for next generation.

■ New Master Family: Master 20/25

Master 20 and Master 25 CNC cutting machine are new Master family that covers virtually any application and all features as current Master series. This new system is a mid-range machine that offers small floor space large cutting range for processing cutting thick / thin materials and large / small pieces.

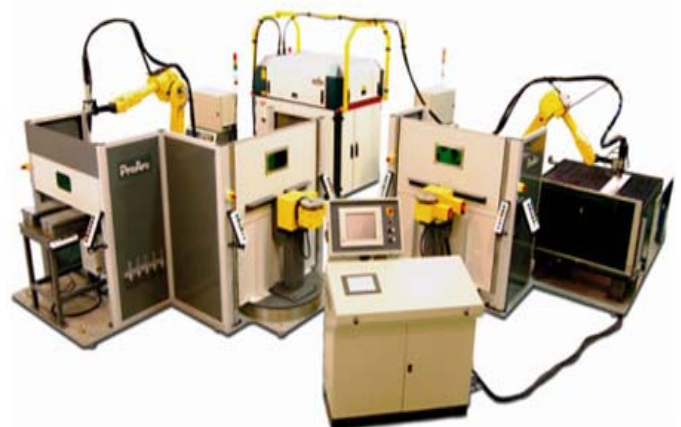

This revolution system can be used with oxy-fuel, plasma and high-density plasma for high productivity and high precision application. It will replace previous optical tracing system to resolve your accuracy and floor space trouble and can increase average production by 35%.

To maximize efficiency, ProArc had integrated with Hypertherm's Hyperformance series plasma with cutting software for cutting service job shop on small piece cutting that really create added value on your scrap and increase your business profit as well.

■ Laser Work Station Application

In the field of Nd: YAG Laser, due to the beam delivery going on with the optic fiber, application of many work stations must carry all conversion by "Beam Switch Module". It is necessary that the output of every optical axis should have an independent optic fiber to deliver to the work station.

Nd: YAG Laser work station usually formed by Joints-type Robot and external axle in order to provide 2D/3D welding/cutting.

■ Annual Rebating Golden Month

Annual rebating month is coming again. We specially select 3 kinds of welding positioners for our valued customers like models PT-100/PT-200/PT-450M which are the most popular products in the automatic welding market for this year 2006.

Benefit for PT-100/200/450M:

1. One free main P. C. board for min. 6 sets of combination order
2. Two years warranty
3. CE conformity

The period of the preferential program is from Sept. 1st to 30th, 2006.

Please visit our new homepage: www.proarc.com.tw for more product information.

■ BRICs - India

Over the next 50 years, Brazil, Russia, India and China-the BRICs economies-could become a much larger force in the world economy. This is the reason why most attendees come to this show is to see what's new and how they can get the new technology into their production for next 5~10 years to meet challenge in the world.

ProArc with our India distributor Magal is pleased to exhibit our Master 40 and ProArc sensor integrated with Hypertherm's plasma system, cutting demonstration was held in INTEC exhibition Coimbatore, India on July 7, 2006.

■ ProArc's New Homepage

This is to announce that a significant change has taken place in our homepage www.proarc.com.tw

Through this update it will be able to offer our customers a wide range of excellent services not only our products but also an easy way surfing our website. We hope you find it informative and accessible. All comments to the change of its format and contents are mostly welcome.
